**Supervisor Ray Haupt, District 5, Chair**

In accordance with the provisions of Section 2279 of the California Food and Agricultural Code, I am pleased to submit the Siskiyou County Annual Crop and Livestock Report for 2021. This report represents estimated acreage, yield, and gross value of Agriculture products in Siskiyou County.

The gross agricultural receipts for 2021 totaled \$386,571,867. This represents an increase of \$13,679,526 from the 2020 growing season. The increase is attributable to the value of strawberry nursery plants, and above average production of this major crop. Our other major crops, field and vegetable crops, and livestock, declined in value due to adverse conditions during the year. Moderate to severe drought conditions again affected agriculture production in 2021; irrigation water was limited, fallowed acres increased, the shorter irrigation season impacted yield and quality, and massive wildfires burned up rangeland and timber.

The figures contained in this report represent gross values only, and do not reflect a net return to the producer or the cost of production, nor do they reflect any one individual operation since the entire county is the smallest unit measured for any particular commodity.

I sincerely appreciate the efforts and cooperation of all the agricultural interests which provided production information. I especially thank the department staff for compiling and producing this informative publication.

Respectfully submitted,

JAMES E SMITH

## MISSION STATEMENT

We are charged with promoting and protecting the agricultural industry of Siskiyou County. We ensure that the consumer has confidence that they receive accurate weight and measure in the market place. We protect the environment and the citizens of the county through our environmental and natural resource protection, consumer and industry protection, and animal control programs.

Siskiyou County has a rich farming and ranching heritage with many fourth and fifth generation operators. Livestock and field crops are the most common agricultural type of production in the county. Strawberry nursery production has recently become one of the county's most valuable crops with plants exported to many countries worldwide.

We are committed to serving and protecting Siskiyou County's agricultural industry as well as the County's unique and diverse landscape.

# Weights & Measures

## Primary Functions:

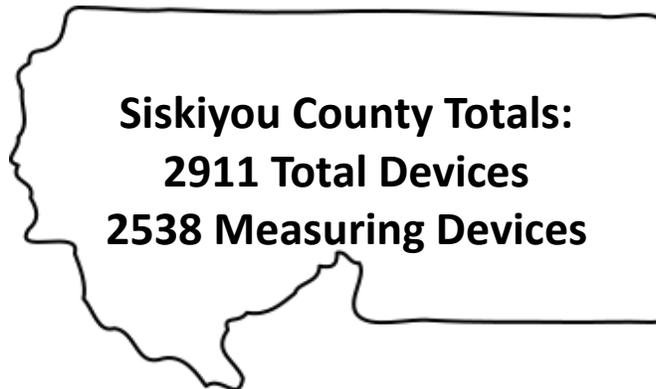

To ensure fair competition for industry and accurate value comparison for consumers

To ensure the accuracy of commercial weighing and measuring devices

Verifying the quantity of both bulk and packaged commodities

Enforcing the quality, advertising and labeling standards for consumer products

Siskiyou County's Deputy Sealer of Weights and Measures tests a large variety of devices: from small capacity scales used at your local farmers markets to vehicle scales for semi-trucks. Any device that weighs or measures must meet use, accuracy, and precision requirements, before they can be placed into commercial use. If the device passes inspection, our Deputy Sealer places a visible paper county seal on the device. When you see this sticker on your local grocery store scale or gas pump, you can be assured you are being sold an honest weight or measure.
