MARK BRADFORD, CHAIR | PATRICK PULUPA, ESQ., EXECUTIVE OFFICER

- A public hearing is tentatively scheduled for

Date: 22/23 August 2024  
Time: 8:30 a.m.  
Location: Central Valley Regional Water Quality Control Board  
11020 Sun Center Drive, Suite 200

Physical Meeting Location with Remote Meeting Option

The final meeting agenda

([https://www.waterboards.ca.gov/centralvalley/board\\_info/meetings/](https://www.waterboards.ca.gov/centralvalley/board_info/meetings/)) will be available at least 10 days before the meeting. The agenda will provide the anticipated date the hearing will be held for this item and anticipated order of all agenda items; however, the Board may consider agenda items out of their listed order. The agenda materials may also include staff revisions to the tentative Order.

## I. BACKGROUND

The Draft Federal Nonpoint Source Permit proposes to regulate certain land management activities conducted by, or on behalf of, the United States Forest Service (USFS) and the Bureau of Land Management (BLM) within the Central Valley region. Central Valley Water Board staff experience has shown that USFS and BLM projects are not always conducted in a manner protective of water quality. In addition, increased extent and severity of wildfire across the state has prompted the USFS and BLM to commit to increasing the pace and scale of forestland management activities. These considerations, in part, require the development of this Draft Federal Nonpoint Source Permit and a supporting environmental analysis (i.e., the Draft EIR).

The Draft Federal Nonpoint Source Permit proposes to cover nonpoint discharges of waste to surface waters from vegetation management, transportation management, recreation facilities management, post-emergency recovery activities, and restoration activities. Activities not covered under the Draft Federal Nonpoint Source Permit include mining, discharges of hazardous or human waste, activities conducted by third parties not on behalf of the USFS or BLM, or grazing activities.

The Draft Federal Nonpoint Source Permit relies on permit criteria and conditions, implementation and assessment of best management practices designed to mitigate discharges of waste to surface waters, and adherence to the standards and guidelines contained in federal agency guidance documents to ensure compliance with water quality standards. The Draft Federal Nonpoint Source Permit requires the agencies inventory and treat controllable sediment sources across USFS and BLM managed lands within the Central Valley region, comply with pesticide application requirements, and monitoring and reporting conditions. The Draft Federal Nonpoint Source Permit also requires each federal agency to identify HUC 12 watersheds for landscape scale assessment and treatment of controllable sediment sources every 10 years.

Please refer to the Draft Federal Nonpoint Source Permit (including attachments), and Draft EIR (including attachments) for further information about the proposed project. These documents may be viewed at the following webpage: ([https://www.waterboards.ca.gov/centralvalley/board\\_decisions/tentative\\_orders/](https://www.waterboards.ca.gov/centralvalley/board_decisions/tentative_orders/)).
